

Bespoke Dwelling - Fowey

Contract Value:
£200,000.00

The clients brief was to form a sustainable and contemporary new home within their existing garden.

The site is within the Area of Outstanding Natural Beauty and the Conservation Area of Fowey. Embracing the stunning views of the mouth of the River Fowey whilst remaining sympathetic to the surrounding area, are seen as key opportunities in formulating the current proposal.

In response to this, the local palette of scantle slate and vertical boarding have been given a contemporary re-interpretation. With a sustainable green roof, where the attention to detail will be essential.

The proposal fully utilises sustainable technology to further reduce the impact on the environment whilst reducing future running costs. The design has been in close liason with our in house accredited energy assessor throughout the design stage.

The scheme is currently at the pre-planning application discussion stage where the initial Case Officer feedback has been positive.
